

Hello Supervisors:

We SUPPORT the changes in item 3b reducing current restrictions on medicinal and adult-use cannabis cultivation within unincorporated areas of Mendocino County.

..then some of your own words. 3b is about phase 3, but **also** allows people in unincorporated mendo county to grow up to 6 plants (without that crappy 100 square foot limit) and 12 plants if there are two people.

There are more than 25 letters fighting that idea and very few in support of it. We all know phase three will happen at some point, so let's help the folks who can't get licenses or who don't want to by getting them at least 12 legal plants in their yard without getting hassled. All it takes is a quick email.

Thanks (and yeah, sorry this isn't CEQA related. Send the email anyway?)

Petra Buchanan
