

It appears that there has been a quick move to undo cannabis regulations which are a result of much discussion from different parts of our community. The county seems to be struggling to get existing cannabis policies to create a positive benefit for the county. Expanding its range in the county, I believe, would just expand difficulties for both the county and the general public.

It might enhance the incomes of one group, but it increases negative effects to our environment and quality of living, and does not appear to increase our tax base so we can repair our roads, etc.

In short, I would hope that you would oppose expansion of cannabis activity in residential neighborhoods.

Thanks you,

Elliot Little
