

We are very concerned that the current proposed Cannabis Ordinance is going to ruin our way of life here in Mendocino County. If this ordinance is passed as modified it could allow 12 plants on a residential parcel with no setbacks. It is not fair to have this happen to residential neighborhoods of acre or less. We also fear that home invasions and other crime will put a huge burden on the already understaffed Mendocino County Sheriff's Office. It is our belief that most of the cannabis currently grown is currently not consumed by people with "medical" needs but sold on the black market.

We have already had to deal with the rebuilding of our home after the Redwood Complex Fire in 2017. Please do not add this to our misery.

George and Nancy Borecky
