

It has been brought to our attention that the Board of Supervisors will be considering an agenda item next Tuesday, item 6A, to limit the Planning Commission to 5 seats (one for each Supervisorial District) and remove the two at large seats for appointees “ with a knowledge of either agriculture or forestry”.

We believe the two at large seats are very important to our county. There are many things that affect farmers and forestry businesses that the public may not be aware of unless you have someone in these fields with that knowledge. Please do not change the status of the board.

Sincerely,

Kathe & Ken Todd
