

I'm looking at the proposal for the allocated funds from the PG& E Settlement. Where is there any mention of Potter Valley anywhere? This valley's roadways have been destroyed by all the heavy trucks hauling in & out all the dozers and other equipment required to battle the wildfires. Why are Potter Valley & Redwood Valley not even listed in any way shape or form to receive benefits from the money received from this settlement that is supposed to be solely for Potter Valley and Redwood Valley. This is an outrage! This may be rural Mendocino county but that money is for Potter Valley & Redwood Valley. We had to watch our neighbors burn to the ground & were told no help was coming, there was to be no relief & if we wanted to try & save our homes we were on our own & now this board has the audacity to divert money specifically for us after such a horrible tragedy that still haunts many of us! We do not need a public health infrastructure/covid center! That is an insult to our intelligence. I strongly urge this board to reevaluate the uses for this settlement. Do what is right.

Sincerely, Jill Holcomb Potter Valley resident & fire survivor.
