

I urge the Mendocino Board of Supervisors to adopt non-lethal methods to control wildlife within this county. I urge the Mendocino County Supervisors to allow Animal Care Services to administer non-lethal methods to control wild life such as Marin County and various other regional counties are doing.

It can work and should be used to prevent the cruel slaughter of our counties wildlife.

I am a long time property taxpayer and voter in Mendocino County and will closely monitor the results of the Board's action on this matter
