

To whom it may concern,

I write as a long term Northern California resident and California native. I am a wildlife lover and actually have a trip planned to Mendocino this summer. We plan to view wildlife while there.

I write to urge the County to terminate its contract with the USDA Wildlife Services and cease use of Wildlife Service's lethal Integrated Wildlife Damage Management Program. Instead please establish a non-lethal program to address wildlife damage which is to be administered locally.

Thank you for the opportunity to comment.

Sincerely,

Michelle Mackenzie
