

There has to be a more humane way and non lethal way of managing wildlife than is currently operated. It is neither compassionate or forward thinking (kind of like a bull in a china shop!) We need to co-exist - it is after all there home too and before we humans took over everything for our monetary gain. There has got to be a compromise and meeting of the minds so everyone is satisfied.

I hope this will reach the board for tomorrow Tuesday 23 March.

Thankyou

Helen Johnson, Potter Valley
