

Hello,

Mendocino County Board of Supervisors:

Teaming up with the Humane Society of the United States and Mendocino Non-Lethal Wildlife Alliance will bring a more enlightened way of dealing with the situation of unwanted predators.

I want to express my wholehearted support for the wildlife management practices you have on your agenda for March 23, 2021.

I strongly encourage the Board to spend the county's money with a vision toward instituting humane practices which will not harm wildlife, nor our domestic pets. The past practices of USDA Wildlife Services should be eliminated immediately, should not be condoned, and should certainly not be funded by public money.

On March 23, I urge you to decide to move forward and implement a management program which will help farmers and homeowners to implement alternative humane solutions which will solve the problem of unwanted predators, and will have a positive effect on our ecosystem.

Thank you very much for your time.

Julie Rogers
