

If you supervisors have any morals left please vote against this proposal on marijuana. We do not have the water in this county to support these corporate grows. People are already in dire straits in having enough water to make it through the year as it is. The lack of code enforcement has made a dangerous situation even worse. The destruction of riparian land is rampant. There needs to be an emergency declaration now to protect the people of the county now. This needs to be decided by the people and not you guys. Please vote against this proposal!!!
