

I have no background in Cannabis farming, processing, distributing or anything else related to Cannabis. I do own a piece of land east of Willits. Over the last two months I have been reading and listening to whoever and whatever I can find. I figure it is best to make decisions with information not emotion.

Please don't increase the amount of land that can be used for growing. Wait to increase size once a policy has been agreed on AND that policy shows that it works. It makes no sense to me to expand when there are so many problems now. The bigger the growth...the bigger the problems. It would be good if Mendocino County was showing the rest of the state how to do it right. Right now it seems that we are trying to follow other counties and get the money before it goes somewhere else.

We have too much to lose to go bigger. Our community, our safety, our environment and our way of life are at stake.
