

Hello, I am a citizen of Mendocino county and I have lived here for 3 generations as well as starting my own family into the 4'th generation. My family has been apart of this county for a long time. It used to be very beautiful! Until big illegal pot growers moved in and started taking over, raping the land and taking our water and natural resources in an over abundance. I am not against small family pot growers, but Please tell the supervisors they must not adopt the proposed Cannabis Land Use Ordinance. Tell them that any expansion of cannabis in Mendocino County must be preceded by a county-wide Environmental Impact Report (EIR).

I am not in support of turning our towns into an industrial cannabis growing county. I would rather see our families grow up in the beauty of nature undisturbed and in a peaceful rural county with vegetable farmers and animals. Let's please keep it this way instead of turning it into a small city and ruining our natural resources and environments.
