

I oppose any expansion of cannabis growing, period. I will base my future votes for supervisor on your responses to this issue. We especially don't need large commercial grows in this county, and we don't need to be converting rangeland and oak woodland for this purpose. I should think that in a period of drought, the Board of Supervisors would place water usage as a very top priority. Finally, enforcement of the current rules needs to be taken seriously and funded realistically.

Yours,

Paul Putter
