

Mendocino Co. Board of Supervisors

While considering the vote on phase 3 Bos please also consider the courage and entrepreneurship of the few growers that actually want to play by the rules and have traveled the difficult and expensive path to become legal growers. In my view the ability to expand and keep pace with the industry in other counties, states and countries is vital to keep Mendocino Co. on a path to financial stability.

I know there is much dissent over expansion and I can say from personal experience that much of it comes from growers both permitted and without permits to protect their financial interests. It would be sad to see this County shrivel and dry economically while watching Counties to the south blossom especially since we were one of the original Counties in terms of allowing the freedom to cultivate marijuana.--thank you --Don Dooley
