

I will not bore you with more long-winded oppositions to cannabis expansion in this county. But I will say this: environment is primary. Community is primary. And cannabis is out of control in Mendocino county.

Mom and pop is not the problem. The new gold rush is the problem. The people who have moved in here to take advantage of loopholes for cash for the most part could care less about our county, our land, our community. Things are already untenable. Water trucks are tearing up our county and private roads. Water is being sucked out of the Willits and other aquifers and creeks at an alarming rate, strictly for growing cannabis.

You know the drill; you know your responsibility. Do not allow expansion of big Grows. Gird your loins and be courageous and then rigorously regulate what is already out of control. Generators 24/7; lights on all the time, destroying the night view. People trespassing on private property. The list goes on. You know the list.

Do your good work. For our County, its land, its people.

Thank you for listening.

Henry Shebitz
