

My name is Heath Blackwell

I was born and raised in Laytonville.

I am a employee at Henry's Original.

This company has provided a great paying job and a career opportunity in legal cultivation. As all you may know there is little employment in Laytonville and what jobs there are, they pay very little. Henry's is good for this town. They provide good wage, equity in the company and a career opportunity to expand in legal cultivation. It is a great opportunity for this town to grow as a community and provide good paying jobs. Without Henry's I believe our town will end up like Covelo. The cannabis industry is only getting bigger and we need this 10% to be able to compete with other counties that are doing 10%. Henry's has given me and my family a better life. We need to focus on eliminating the black market and expand on our legal grows. Eliminate the black market and we as legal growers can provide jobs, equity and community growth with this 10%.

Thank you for listening
