

My name is Jimmy Campos and I support Phase 3 and the 10% enhancement because it allows more spending in the community and more opportunities for people and businesses. When communities can grow, everyone prospers. I work in the legal cannabis market. I spend about \$115 per week on groceries. Growth in the community can provide more growth like, auto shops, restaurants, movie theatres which will be more of an attraction to visitors and bring more revenue to the County.
