

BOS- I am totally opposed to the expansion of cannabis/permits in this county .We are beginning another terribly worrisome fire season. Our water is about to be rationed. It is dangerous and illogical to even consider more permits without an EIR. I am appalled that my representative- Mr. Williams is in favor of this idea.From what I understand on the news ,the local growers are already suffering a confusing and difficult permitting process. What is the point of allowing out of the area companies to use our water and land? I look forward with trepidation to this coming meeting. cassie elberg-gibson
