

Hello my name is Travis Manion I have been a resident of Mendocino county for 39 years. Being a working citizen of Mendo county and living in the district 3 their is few to far jobs that can support a family. I was a employee of hardwood products. It was great job but sad to say in the early 2000s hardwoods closed. Many people left and found employment in other towns some other states. Henry's original is good for Mendocino county because they supply jobs and work when there is so few legal jobs in laytonville. If you grant this expansion we can compete with the surrounding counties . Henry's original also has health benefits and equity.. also safe work environment unlike working in the hills where you may go up and never come back. Thank you for your time and consideration.
