

Hello,

My name is Jordan Pool. I'm a local ,licensed distributor here in ukiah and my business is failing because I cannot find product to distribute. The amount of legal product going around in this county is so little that I cannot operate a business. Expansion will not ruin the market for the small growers. I'm sorry to say but the other cou tied along massive canopy have already done what they are afraid of. Mendocino county will not sustain at 10k cap. We will, as a county be pushed out of the industry this economy so deeply depends. On I would love to see an emergency ordinance make it so we can get plants in the ground this year. I think doing 10% canopy of total acreage with a 3 acre cap would be best for the county right now. I should add that I am on 80 acres so this suggested cap is for the community not for my own self gain. I'm fully committed to dedicating my time as well as my compliance teams time in to donations any help you need to get this in motion

Thank you,

Jordan Pool
