

Hello,

I am writing to express my support for the passing of the proposed Phase Three Commercial Cannabis Ordinance. I have lived here in Mendocino County for 50 years. I have been and still am a productive member of our county. I have been married and raised a family in this county. I was instrumental in starting Spyrock School where my wife taught and our kids went to school. They say "it takes a village" and I am a believer in that. All my kids graduated and continued on to the University of California at Berkeley and also Santa Barbara where they graduated with honors. They could not have done that without our community's support. I have served on four different non-profit boards and believe in citizen participation to represent county members needs and desires.

I am asking you to please vote "YES" on the proposed Phase Three Commercial Cannabis Ordinance. This will help local farmers and help keep Mendocino County on an equal footing with the other counties in the state.

Thank you for listening to and considering my request. I remain, sincerely,

Jesse Cisney
Laytonville
