

Dear BOS,

My name is Brendan Miller, I have previously lived in Mendocino County for 10+ years, but moved away because of the lack of job opportunities. About 2 years ago I was finally able to move back to take a job with a legal cannabis company in the county I have always considered home. Without expansion in this industry, I fear that myself and many others may be in a similar position that I was in 2 years ago. Expansion in the cannabis industry is good for the economy of California and specifically Mendocino county. it will provide jobs for many, which will lead to expansion in all areas of community and county. This will only help Mendocino County.
