

To the Board of Supervisors:

Our family is adamantly opposed to the approval of big cannabis grows in our county. To try to force this issue when we are facing very real problems of the availability of water for our communities, our citizens, and our farmers shows, at the very least, an astonishing lack of common sense.

It's unconscionable to insist that the cannabis "industry" be favored over the needs of the people and communities of Mendocino county.

Clean up the mess that has already been made, and don't approve any expansion.

Thank you,
Greg and Lori Trew
Willits
