

Regarding your meeting on April 19, I would like to strongly express my opposition to further cannabis cultivation. PLEASE: reread the Mission statement of your entity. Which part do you not understand? I realize 'you can't make all of the people happy, all of the time" but on this issue I believe close to all of the people are unhappy. From all I have read and heard, the cannabis situation is out of control and dysfunctional, if it was even close to being either, and issues of water, environment, legality, safety, crime, health, law enforcement, loss of property value and other issues of which I am unaware need to be addressed and functionable before even considering putting the whole of our beautiful county and quality of life further in jeopardy. Who do you think you are to make us pay for your shortsighted greed? Are you afraid to let us VOTE on this issue? Are you afraid of an EIR ? If so, why? Respectfully submitted, Charlene D.
