

I am writing to urge you to please vote no on this cannabis ordinance. The cannabis industry is highly destructive to the environment. Please don't allow anymore growing than we already have. We have a severe water shortage in the county. In my opinion, there will be "water wars" going on this summer. The people that already grow, will continue to grow cannabis and will stop at nothing to get the water they need. Please, vote no! We don't need anymore cannabis in this county! Thank you. Mark Carlstedt.
