

3a Facilities:

Dear Honorable Supervisors,

There is so much work yet to be done... Since there is a facilities & a cultivation side to this CCAO ordinance you are considering today, we want to state that our wish is that the item would grandfather in not just zoning types for cultivation but for facilities for Phase 1 small farms as well. It would be so helpful to be able to more easily process, have wholesale distribution & retail & or non-storefront delivery from our own farms. A cottage & or micro-business accessory license that fits for all cultivators to have more autonomy over their products from seed to sale must be aligned with the state laws. We are excited about farm tours & farmers markets & cannabis infused eco-tourism. Please review & support CCAG & MCA memos. Also, as you will hear from us in item 3b, to sum up our stance, please consider the idea that Phase 3 cultivation can move forward without expansion at this time!!!

Thank you, Laura & Marty Clein
