

Hello,

I am writing to express my opposition to the Phase 3 ordinance, due to the expansion that is entailed. I have been reading on it, and trying diligently to get a better grasp of some other aspects.

But I am not a grower, and it is confusing. I do think more public outreach sooner was needed.

I have read commentary from local legal growers, who are trying to wade through all this, and have reservations, so I am also following what they say, since they are working hard and know the issues.

It does not help confidence that the process of licensing here up to now, has not been well run, which affects my confidence in this ordinance, with knowledgeable growers, at least what I've read, having so many concerns.

Thank you,
Suzanne Farris
