

Dear Board of Supervisors,

I'm a retired teacher and artist and have lived in Mendocino County for 50 years. I treasure wildlife, clean air, fresh water and living in the small town of Willits. Because of the drought, the upcoming fire season and encroachment of development into the countryside, I am not in favor of allowing big commercial grows of any type.

I'm concerned with fencing in these outlying areas that will prohibit the movement of wildlife. We need wildlife corridors, not farms in outlying areas.

Please do not allow these commercial grows to increase and please work on regulating the grows that are already in existence.

Sincerely,
Linda MacDonald
