

RUSSIAN RIVER NOW 4/17/21 -Low flow spreading scum...

Stop making amendments to the ordinances in place to protect our county land, habitats, animals, property, air and water quality and our dire, critically low water supply.  
These change proposals threaten the existence of what is cherished, why so many chose this county as our home and poured so much into our homes and property.  
Do not approve the amendments to Chap.20. 242. Care about Mendocino County not cannabis revenue.
