

We live on the McNab Ranch with 40 acre minimum lots. One reason for this is lack of water.

We are not totally opposed to cannabis grows but we are disgusted that we have been overrun by so many (illegal ??) ones, the ugly fences, grading of hillsides, tree cutting, dumping and the never ending traffic and countless heavy water trucks destroying our roads.... and nothing we can do to get them to compensate for it not to mention the 24hr lighted hillsides from every window....is this the view(s), issues and costs outside your home????

I'm becoming embarrassed to say where I live!!!
