

I urge all the supervisors to vote no on the proposed Phase 3 cannabis expansion. The current system of permitting is not working. -The system needs to be fixed before opening up Phase 3. The present rules need to be enforced first. As its stands now, it like the wild west, just do what you want. The board needs to support the sheriff with more manpower.

Please keep in mind that the voters of Mendocino County have already said they didn't want large grows, and this Phase 3 is just an end run around the voice of the people. Keep our rangeland and agriculture protected from this end run.

Let's help the responsible, honest growers stay permitted, and start weeding out the bad apples who are raping our lands.

Thank you, Michael Williams
