

I urge you to say NO to the proposed cannabis land use ordinance for two principal reasons:

Traffic - our rural county roads are already over-burdened and in a degraded state and we do not want yet more heavy truck traffic delivering soil, water, etc..

Water - with no end in sight for the drought and the looming water crisis it is evident that the county has barely sufficient water resources to meet even minimum current needs. The production of cannabis is a heavily water intensive activity and frankly I am surprised that this expansion of cannabis production is even being considered at all at this time. This is not a good idea - please say NO.

With respect,
Christopher Martin
