

i'd like to take this opportunity to air my voice in the issue of the large grows that will certainly encroach on lands and habitat. I am against this whole heartedly. We already see evidence that large operations do not fare well under our limited water resources just to name one. I do not believe the cannabis grows are 100% organic and I am concerned how waste products would be dealt with. Bottom line is it's just not a good idea. This all sounds like profit profit profit. This community is not about that, if it was we would have chain stores and the like. And what really strikes me is that this board is willing to let a huge for IProfit company come here but not take care of the citizens that don't have adequate housing, but that's another issue isn't it. I hope the board Considers all of our voices and deny this action.
