

Please do listen to the Mendocino County voters, who have already voted down expanding cannabis on our range-lands in2016, and stop the expanding of cannabis operations in our county. We need to protect our small growers, family farms and the local economy. Opening to large operations will only destroy our wildlife, environment, and the economy as large growers will be taking their money out of our economy.

Please protect what makes Mendocino County beautiful, and so a great tourist spot, and strong.

Thank you for listening.
