

To whom it may concern,

Please vote NO on Corporate Weed, 10% Expansion and Encroachment into Rangeland.

Allowing this to pass will not only allow Mendocino county to become corporate Cannabis, it will destroy any and all small businesses. If you allow people to come buy up all of the land and plant fields of Cannabis in the Drought that we are in where do you think the water will come from when we're already in this drought in March?

If there is ever a time that the county of Mendocino becomes low on the amount of marijuana in this county then we should be able to come back and try to vote on this again but until then We don't want to see Hoop houses where our food should be grown.
