

Dear Board of Supervisors.

The Governor has declared a drought emergency in our county. We have a president that is acknowledging climate change. It would be extremely dangerous and irresponsible to continue expanding cannabis growing in this situation. Fire season has started, soil and water trucks are racing up our roads and generators are spitting out greenhouse gases and nighttime noise. Please kill the 10% ordinance now. The dangers are obvious and growing.

Sincerely,

Sandra Mullen  
Covelo, California
