

I have read quite a bit about the illegal huge growth in marijuana farming. The voters were victims of bait and switch and the legal right to grow 12 plants was stripped away with ridiculously expensive and prohibitive rules from the state, county and city officials. Instead of very small gardens removing marijuana buyers from the black markets and expensive clubs....we have corporations and organized crime destroying communities to get that dollar from people that were restricted from growing! A stupid merry go round operated by the people that are in charge. Thank you greedy lousy corrupt politicians and law enforcement. You are the ones responsible not the people that merely enjoy marijuana and wished to grow for personal use only, not making meth and heroin money from it. Short sighted and evil is the system of crap that they continue to create with impunity to be responsible for the damages they cause. Small hippie gardens with nothing over 12 plants as was voted on would never have created such water wasting and usage, environmental damage, crime, havoc and and disgust with our elected officials.
