

Dear Board of Supervisors,

I am writing to support a county-wide Environmental Impact Report as essential in regards to cannabis expansion. An environmental impact report by Use permit and the Planning Commission cannot protect our wildlife, water and way of life here. Also, I am voicing my opposition to the "10 percent rule" where cannabis cultivation would be allowed on 10% of the total land of a parcel with a minimum size of 10 acres on lands zoned as agriculture or upland residential.

I am a longtime resident, property owner and taxpayer in this county.

Thank you.

Kathleen Fitzgerald Azarnoff
