

“I vote yes for phase 3” “Mendocino County needs phase 3” “Vote yes on phase 3”

Statement for Hopland Meeting

I like to see the Cannabis industry growing tremendously in California. There are places as Santa Barbara or Salinas that a few years ago you wouldn't think they would be growing Cannabis. It has been a big impact for these regions. I want to see Mendocino County expand this business that creates multiple jobs and the economy gets the benefit with this industry.

It is a win win for everybody to try to increase the legal market that will bring to the plate more income to the communities that are producing Cannabis. This meeting in the future might be a legacy for future generations with more and better opportunities if we expedite laws that help growers to compete with other regions or counties that already have laws that are helping to grow more legal Cannabis.
