

I oppose the expansion of commercial cannabis operations in our county. I have lived in this county for more than 40 years. The extreme drought and insufficient oversight of existing regulations are only two of my many concerns. Also, we already voted against the expansion in 2016 and won. Nothing has gotten any better since and problems with the everyday operations have become clear and have not been solved yet. There is no need to rush. We live in a beautiful county and should be very, very careful with any type of development. Respectfully, Renate Kuhnert
