

Mendocino County Supervisors,

The worst drought in the state's history is occurring now. It makes no sense to expand legal cannabis grows at this time. Obviously.

Instead, all efforts should be focused on eradicating illegal grows and code enforcement on existing legal grows. We deserve an accurate accounting of where the licensing fees and tax revenues are going.

The interests of Mendocino County residents are not being taken seriously by the board, except by Mr. Haschek.

We have made our concerns known with our votes, and our voices. Our extremely valid concerns are being ignored by those elected to represent us. One has to wonder why our elected officials are so anxious to placate large growers while the rest of us are scraping to save every drop of water. We expect to be fairly represented by those we elect and that's not happening.

Expanding cannabis now is a slap in the face to every resident of this County who won't directly benefit from it as large growers.

Do your jobs. Represent our needs and our vision for this beautiful, fragile place

Dr. Sheri Cronin
