

Hello again Supervisors,

Please do not spend \$4 million of the PGE settlement funds to truck water to the village of Mendocino. That makes no sense. It is my understanding that the money was intended as reparations for the horrific fire in 2017 and for those communities that suffered directly from that disaster. Solutions to water shortage issues on the coast MUST come from a different source.

Please consult the RVMAC for advice on how to spend the \$10 million. They are the representatives for our community. And they listen to the community. Please open it up to public comment and don't make any decisions until you have talked to the people who lost their homes and loved ones and had to run for their lives and ask them what they would like to do with the money.

It seems like this current Board wants to do what they want and think they know better than their constituents. I have been lucky in my 10 years in Mendocino County to feel our local government really listened to the people and worked together with the people to make decisions and laws. Unfortunately, I am starting to lose hope in our local government.

Sincerely,
Sandra Berman
