

As a Mendocino county resident I need to say that using funds from PG&E fire \$ to truck water to the coast, specifically Mendocino village from inland should not happen. Inland is going to be having water issues before long if our water keeps being sold to other areas.

That money was meant for fire survivors of the 2017 fires & rebuilding structures that were lost in the fire, not to bail out tourist areas on the coast.

You on the coast have the ocean water to utilize with desalination units.

Ted Williams specifically needs to work on that for his town. Use the one at the old mill in Fort Bragg or purchase one like Fort Bragg is in the process of doing.

The people Mendocino county are tired of the BOS doing the wrong thing, such as for instance cannabis expansion which should not be allowed, our towns & valley areas are being ruined & crime is out of hand.

Do the right thing for your county or face possible recalls!

In good faith

Patricia Caldwell
