

Board of Supervisors,

It's come to my attention that the PG&E 2017 Wildfire settlement money is in jeopardy of going in the wrong direction. I don't understand how that could be the case, as it is clearly earmarked for **Redwood Valley** due to the very traumatic, life altering event which took place in **Redwood Valley** on and after October 8, 2017.

It's a very simple equation...

To the degree in which Redwood Valley was impacted by the 2017 Redwood Complex Fire
=

The degree in which it should be supported.

And, there is not enough money in the world to bring back those lost or ease the minds those who lived through it.

Need we remind you of the devastation?

9 deaths

20+ hospitalized with severe burns

36,523 acres scorched

545 structures lost

8,000 evacuated

Schools shut down

Hundreds of animals lost, relocated, badly injured or died.

Ask yourselves "how would the Shepherd's feel about this?"

Shame on you for your consideration of misappropriating the PG&E funds.

I am deeply disappointed in your direction and I DO NOT support sending the PG&E settlement money anywhere that didn't experience the 2017 Redwood Complex Fire firsthand.
