

Dear Ted,

The documents for my application were uploaded to the county cannabis portal on October 12.

Since then, I have had no communication from the cannabis program about the status of my application.

I am bringing this to your attention, as I am worried that I may not hear from the cannabis program in time to make any needed corrections since the portal closes on Saturday, October 30th.

There is also the possibility that my application may not be fully reviewed before the portal closes.

I strongly urge the county to extend the portal process until all applications have been fully reviewed and the applicants have had the opportunity to make any necessary changes to complete their applications.
