

I would like to know what you're afraid of if you actually allow the public to express themselves openly.

Hiding behind the chief public health officer Coren is laughable. You have the power to remove him just like you appointed him.

He is not representing current knowledge of what has occurred during this plandemic.

Anyone that promotes these jabs for children or anyone will be held responsible according to the Nuremberg Code. Anyone promoting the same type of taking away of freedoms that happened in pre war Germany will be held accountable. "Just following orders" is not enough to excuse culpability .

Sincerely, Anna Zbitnoff
