

Dear Supervisors:

Thank you for placing item 4a on your agenda for mid-November.

I whole-heartedly support updating the management of California's State Forests to promote a livable climate for all rather than to make extra money for a few.

Money does not produce oxygen, gather rain, prevent erosion, shelter animals nor provide shade.

Money can help us get what we need, and I do support plans to put some of California's climate budget into financial relief and job re-training for loggers who are laid off because we let more trees live.

Jennifer Kreger MD
