

Supervisors Gjerde and Williams have submitted a Resolution that I strongly support, seeking Scientific Review of the uses and timber harvesting in Jackson State Demonstration Forest. In 2021, business as it was done 40-50 years ago is not working. The community that values the carbon sequestration of the forest - and that should be all of us - and values the recreation value of the forest, is demanding to be heard, and the State of California has an obligation to review their concerns, as do you as members of the Board of Supervisors.

I will not quote your references, but rather ask that you read the comments submitted by Mary Rose Kaczorowski carefully and consider the impacts and needs of the communities you serve, and the climate impacts of these large actions in our forests.

Thank you,

Marilyn Boese
