

I am asking you to please pass resolution 21. I support this fully and we need to start changing our relationship with our forests.. this is critical for us to start managing forests differently for climate change.

We don't have much time left to implement change on this planet.. our children and grandchildren need us to be wise and fight like hell for this planet.

I hope all of you will have the wisdom to pass this resolution 21 and do your part.. thank you,

Silver Mangini, Mendocino, California
