Summary of Request:

As previously reported to the Board, on August 12th, in response to a work order for drainage issues at the sink in the Public Health Break Room 192 located in 1120 S. Dora Street, Facilities staff identified a plugged drain line and damage to the drain line below grade that has caused water damage to the wall cavity between break room 192 and the adjacent storage rooms 188 and 189. Wet drywall, flooring and cabinetry were found and associated microbial growth was observed on the back of the drywall where the leaking pipe was found. The County's on call Industrial Hygienist documented the presence of both microbial growth and asbestos containing materials in the affected areas. On an emergency basis, work was authorized and is proceeding to contain and remove damaged and contaminated materials and resolve the plumbing issues responsible for the damage. At this time, Facilities is recommending an estimated budget of \$90,000 for remediation and repairs with the assumption that the majority of the costs are reimbursable through insurance.
